

Samsung Social Hub™

Contacts

Contacts is not just a phonebook; it is where you can check e-mail, IM and SNS all at once.

1. Check messenger log in status and updates from social networking sites in real time.

In Contacts, you can see your friend's phone number, e-mail address, IM log in status and start conversations right away.

Also, you can view new feeds and pictures from your friend's social networking pages.

2. Contacts is organized into four tabs.

From Contacts, if you tap a name you will see four tabs; Info, History, Activities and Media.

1) Info

From Info, you can check contact information such as phone numbers and email addresses.

2) History

From History, you can view all your previous communication with friends including SMS, MMS, calls, missed calls, e-mails, IM and SNS messages.

3) Activities

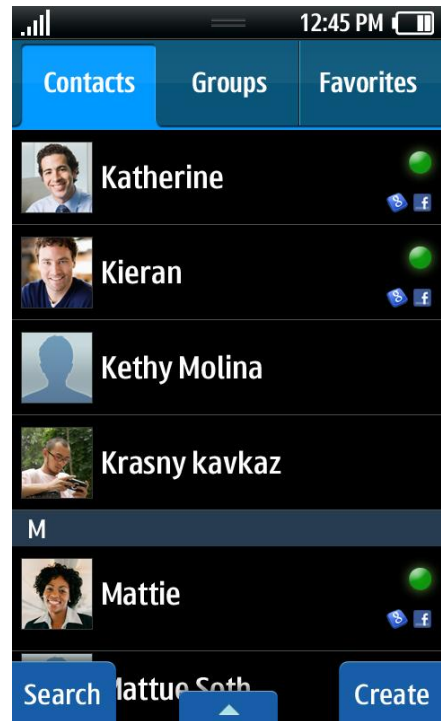

In Activities, you will see new updates from your friend's social networking pages and you can leave comments right away.

4) Media

In Media, you can access new pictures, music and videos from your friend's social networking pages.

3. How to use Contacts

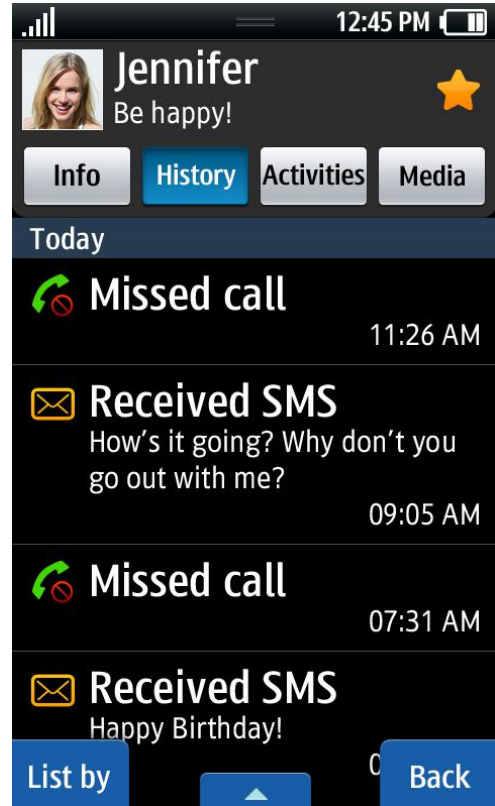

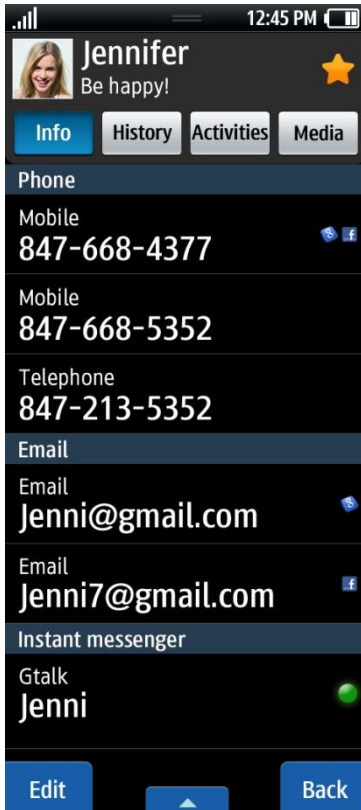

1) To view Contacts

- a. Tap Contacts from the idle screen.
- b. You will see a list of contacts.
IM log in status can be determined by the color of the circle next to the name; if it is green, it means that your friend is on-line.
- c. For more information about a contact, tap the name.

3. How to use Contacts

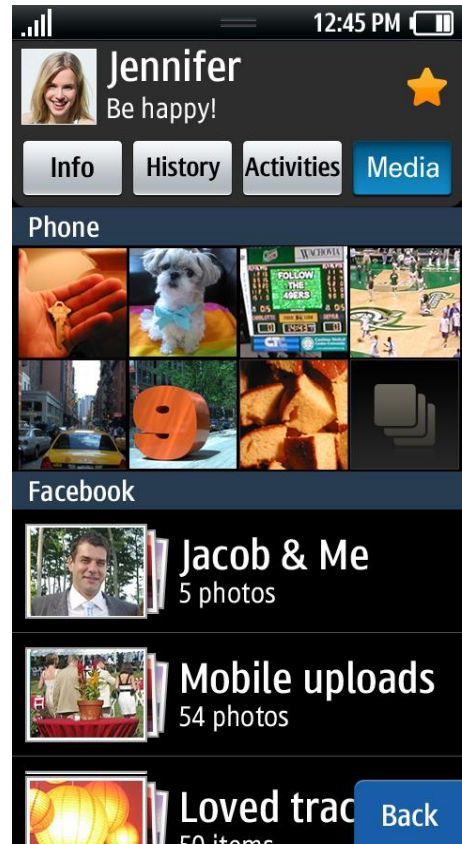

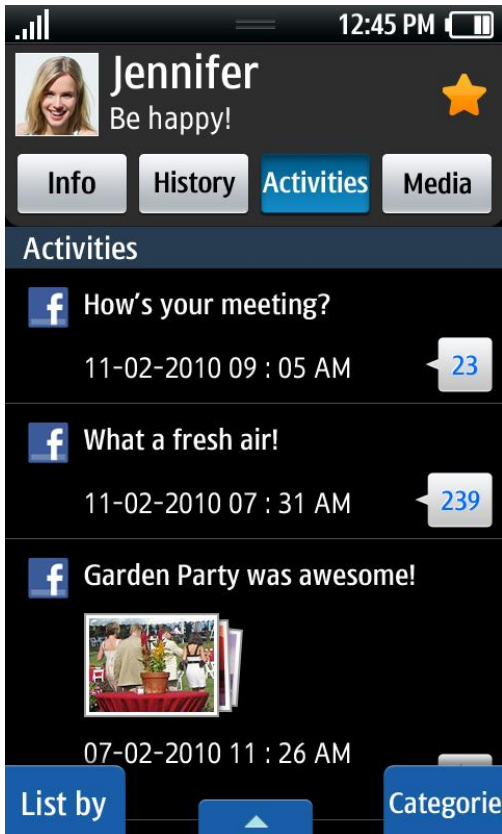

2) Contacts

- a. Contacts is divided into four tabs; Info, History, Activities and Media. If you tap your friend's name, then you will see the Info page with contact information.
- b. If you tap History, you can view the record of your previous communication with your friends including SMS, MMS, calls, missed calls, e-mails, IM, and SNS messages.

3. How to use Contacts

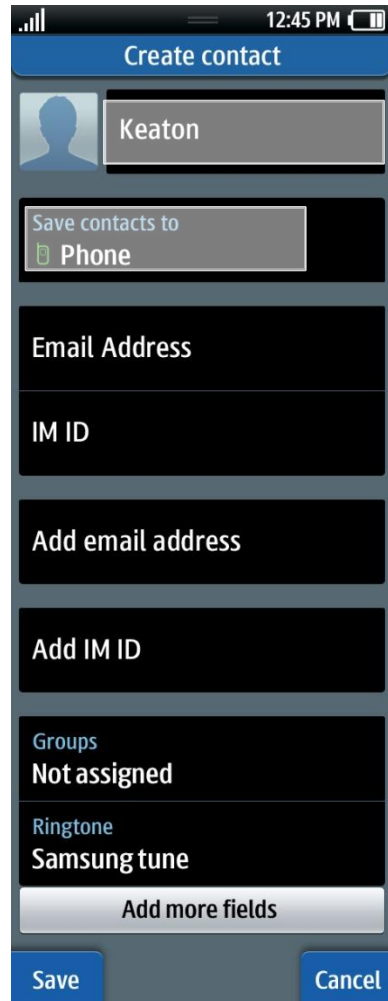

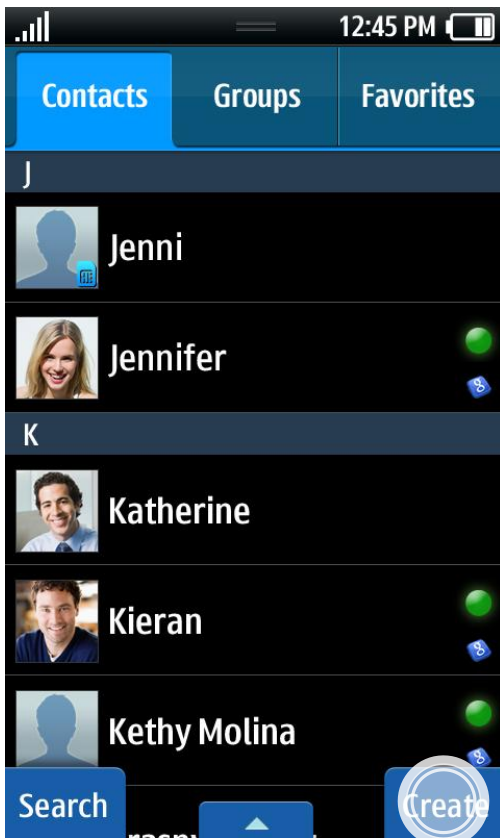

2) Contacts

- c. Tap Activities to see new updates from your friends social networking pages.
- d. Under Media, you will find pictures and music posted on your friend's social networking pages.

3. How to use Contacts

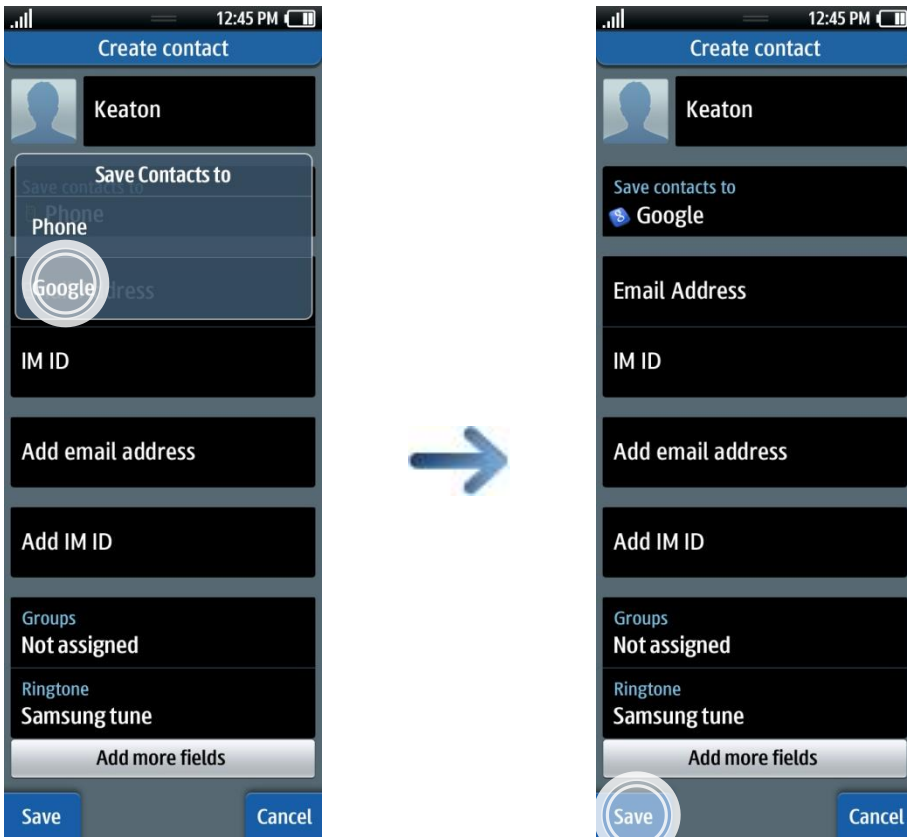

3) To add a new account on Contacts.

- a. Tap Create from Contacts.
- b. Fill in name and contact information.

3. How to use Contacts

3) To add a new account on Contacts.

- c. You may add your new contact to a web-based contact list by selecting an ISP or an e-mail account.
