

Samsung Social Hub™

IM

Do you want to chat?

Go to Contacts and check your friend's log in status; the green light next to your friend's name means he is on-line. Click the green light to say hello. Isn't it easy?

Before Social Hub, you had to launch a separate IM application for each service such as Gtalk or Yahoo Messenger and log in to chat on your mobile. But with Social Hub Contacts, don't bother. You can start chatting no matter which messenger your friend is using, all you need to check is the green light and tap That's it!

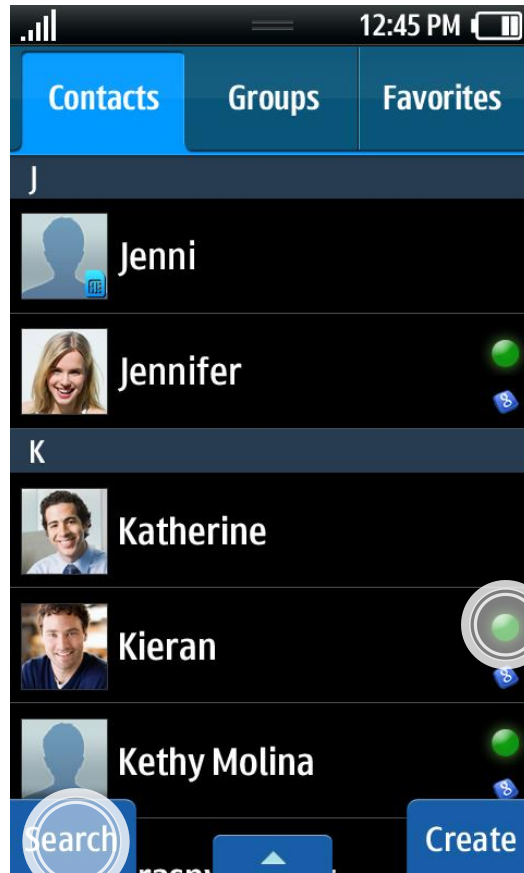

1. How to use IM

a. Tap Contacts.
